

Fire Protection Association of Pakistan

Motivated to promote fire protection awareness and advancement

Appropriate training to fire & safety professionals, fire fighters, people at work place, community and children to prevent the unfriendly fires and reduce the resulting losses is a dire need of the moment. Considering the importance of this vital factor, Fire Protection Association of Pakistan has accorded the top priority to training and has developed various courses with the help of latest material from the advanced world. Informative slide shows, relevant videos, latest clippings and hard copies of training material are being used by the association. At the top of it all FPAP Trainers selected from the various organization of repute have undergone the courses from the institutions of USA, UK and other such countries. Industry and community both are the equal beneficiaries of FPAP training.
